

Log Bench Saw

GRIZZLY 600

Powered by **YAMAHA** OR **JD** aircooled diesel or single & 3 phase electric motors

Description

Scanwood Solutions offers a range of bench saws, all with a blade diameter of 600mm, but with different drive types. Drive types available are: Electric single phase, electric three phase, diesel drive and PTO. The Grizzly 600 bench saw is able make cuts of up to 220mm per cut - enabling the saw to saw logs of up to 280mm using 2 cuts. The Grizzly 600 has a swinging bench, which minimizes the wear on the blade, by ensuring that the log is always placed square with the blade, and also it minimizes the effort required to saw the log, allowing for longer operation hours and less fatigue for the operators. The Grizzly 600 saw bench is built based on European safety standards, and this allows the user to perform cutting operations without incurring any danger on himself. Scanwood Solutions is committed to providing its customers with machines that, in spite of their low cost, ensuring the highest levels of safety.

Maximum log diameter:	280mm
Maximum log length:	Unlimited
Tip speed:	70m/second
Blade options:	Normal or WIDIA tipped blade
Motor:	2.2 KW single phase electric / 3 KW three phase electric / 7 HP diesel motor / PTO - Minimum 15 KW tractor
Blade rotation direction:	Towards operator
Net weight:	134kg
Dimensions:	1450mm x 850mm x 1110mm
Warranty:	12 month warranty
